DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: As per claims 28-37 and 39-47, applicant claims, inter alia, an encoding apparatus having a first and second key section, a data section and a mapping section. The prior art of record, Feistel USPN 4,316,055, Feistel 3,798,360, and Schneier teach or suggest a similar invention; however neither Feistel '055, Feistel '360 nor Schneier either alone or in combination teach the stream cipher key section including LFSRs to generate a first, second, and third sequence of data bits, and a serial network of shuffle units to shuffle the third sequence of data bits using the first sequence of data bits and input bits and the second sequence of data bits and control bits to the serial network of shuffle units as defined in claim 28. Hence, claims 28-37 are allowed. Also the prior art of record does not teach the stream cipher key modifying the block cipher key as defined in independent claim 39. See Applicant's Remarks at pg. 9 of the amendment filed on June 27, 2005. Hence, claims 39-47 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
